vh6/8/20

Priority Summary

I.   CCD identified cases for which expected outcomes could be predicted and may require minimal work once RAD finalizes reports. These cases were binned in priority order as follows:

1. Based on SNUR (##cases)
2. Consent Order (where company has agreed to sign) (##cases)- Management should weigh in on priority of doing orders before NLs?
3. Not likely (straight and follow-up) (## cases)
4. Other (cases requiring a greater level of effort) (##cases)

II.   RAD's priority order of review:

1. Rework-rework of recently completed cases
2. Low Hanging Fruit
3. LOE (from lowest to highest) -human health focused

    a. Lung tox cases and consumer cases with sensitization may be greater level of effort.

    b. Need to balance case load between HH hazard assessors and exposure assessors that are completing HH risk assessment updates

4. Data Review Memo (DRM) date (oldest to newest)

III. Hair on Fire cases- Only cases raised by OCSPP IO as necessary to complete immediately. Should this be a separate bin on spreadsheet? Who identifies and adds to spreadsheet?
